

City of Dunn Update

The City of Dunn’s Phase I Park to Park Sidewalk Improvement Project is nearing completion. This project connects Tyler and Tart Park via either existing or newly installed pedestrian sidewalks. In addition to the sidewalks, bicycle lane markings were placed on streets associated with the sidewalks connecting the two parks. New curb and gutter was also installed along certain portions of the connecting route.

The City Council approved the project in June 2023 and the cost was paid for with federal grant funds from the American Rescue Plan Act (ARPA). Plans call for a future Phase II project that will similarly connect Codrington Park to Tyler and Tart Park and tie-in the Dunn-Erwin Rail Trail to make the three parks safely accessible by pedestrians and cyclists.
